

Writing real letters or drawing a picture to family members and friends that you can't see in person will be both fun and meaningful. Keep it simple and fun!

Write and mail letters to family

Have a Lego design contest

Lego can have such a positive impact! It's a tool to help understanding of **spatial awareness** and promotes **hand-eye coordination**. **Creativity** and **Role Play** allows children to naturally explore **imagination**, Lego also lends its hand to **social interaction** and **collaboration**. **Colour recognition** and **maths and language skills**.

This is really important as it helps keep children calm and focused. It's a great stress and anxiety reliever too. Here are some sensory ideas; rice, pasta, corn flour, playdough, shaving foam, slime, flour, paint, soil, bark, pebbles and jelly.

Prepare some sensory play experiences- these aid relaxation

Build a den or fort

Get the whole family involved in some of these big games, think creatively and help put the children's ideas into reality! Den building offers a range of advantages from physical development to problem solving skills, also turn taking and conversation building.

Learning Objectives:

- To listen to and follow verbal direction
- To demonstrate understanding through actions
- To build vocabulary

Develop number recognition, fine motor and counting skills, adding the correct quantity of pegs to the correct numeral.
